PROFESSIONAL SUMMARY

Independent full-stack web developer with **15 years of commercial experience**, specializing in WordPress, MODX, PHP, and JavaScript.

I started my freelance career in China in 2011, working directly with local business owners. My client base grew primarily through recommendations and referrals.

Over the years, I've worked on **200+ websites**, including corporate websites, e-commerce platforms, multilingual catalogs, custom CMS solutions, and complex integrations.

My strength is handling the entire development process independently — understanding business requirements, choosing practical technical solutions, writing maintainable code, and supporting projects after launch.

More recently, I've expanded into SaaS development, browser automation, and AI integrations, building my own projects with Laravel, Vue.js, Node.js, Playwright, and cloud services.

I use AI-assisted development tools to accelerate development, investigate bugs, review code, and improve implementations while remaining responsible for technical decisions, testing, and final results.

I'm interested in remote part-time positions, contract development, and long-term cooperation with digital agencies.

TECHNICAL SKILLS

Core: PHP, JavaScript, HTML5, CSS3, SQL

CMS & E-commerce: WordPress, WooCommerce, MODX, custom themes, plugins and components

Frameworks: Laravel, Vue.js, Vite, Pinia

Databases: MySQL, MariaDB

Backend & Integrations: REST APIs, webhooks, payment integrations, third-party services, AI APIs

Automation & Cloud: Node.js, Playwright, Google Cloud Run

Tools: Git, GitHub, Figma, AI-assisted development tools

Additional: Responsive development, website migrations, performance optimization, multilingual websites, SEO fundamentals, technical maintenance

PROFESSIONAL EXPERIENCE

Independent Full-Stack Web Developer

Self-employed / Web86 | Remote · 2011 – Present

Started my freelance development career in China, initially working with local entrepreneurs and small businesses. Built ongoing client relationships through direct communication, practical solutions, and word-of-mouth referrals.

Responsibilities and achievements:

- Developed, customized, and maintained 200+ websites using WordPress, MODX, PHP, and JavaScript.
- Built custom WordPress themes, plugins, WooCommerce functionality, and MODX components.
- Developed multilingual websites, business catalogs, e-commerce platforms, and custom web applications.
- Migrated websites between CMS platforms, preserving content structures and addressing SEO requirements.
- Integrated APIs, payment systems, automation tools, and business-specific functionality.
- Worked with existing codebases, improving maintainability, performance, and usability.
- Managed projects independently from planning and implementation to testing, deployment, and support.
- Expanded into SaaS development, browser automation, and AI-powered web solutions.

SELECTED COMMERCIAL PROJECTS

DiogeneAge - B2B & B2C E-commerce

diogeneage.com/

Developed a custom WordPress theme, WooCommerce functionality, distributor registration, separate user experiences, and AI consultant integration.

WordPress · WooCommerce · PHP · JavaScript

USAi Robotics - Security Robotics Website

usai-robotics.com/

Designed and developed a responsive corporate website for a US robotics company, featuring security and inspection robots, technical product presentations, and custom frontend implementation.

MODX · PHP · JavaScript · HTML · CSS

China Dental Clinics Portal - Medical Tourism Platform

china-stom.ru/

Developed a medical tourism information portal with clinic listings, services, reviews, SEO-oriented content, consultation forms, and automated pricing updates based on currency exchange rates.

MODX · PHP · JavaScript · Figma

Reforma Master - Multilingual Construction Website

reforma-master.es/

Redesigned and migrated a renovation company's website from WordPress to MODX. Developed a responsive bilingual website featuring project galleries, videos, and lightweight interactive components.

MODX · Fenom · JavaScript · CSS · HTML

US Business Services - Multilingual Business Portal

usbusserv.com/

Redesigned and rebuilt a business services portal, migrating it from WordPress to MODX. Implemented multilingual functionality, improved content organization, and applied performance and caching optimizations.

MODX · PHP · Fenom · JavaScript

Grand Artists Agency - International Artist Catalog

grandartists.com/

Designed and developed an international talent agency website with artist profiles, catalog filtering, and responsive interfaces.

MODX · PHP · JavaScript · HTML · CSS

INDEPENDENT PRODUCTS & OPEN-SOURCE DEVELOPMENT

FormWatch - Automated Web Form Monitoring

formwatch.web86.site/

Designed and developed a web application for automated form testing, CAPTCHA handling, incident detection, notifications, and assisted troubleshooting.

Node.js · Playwright · PHP · MODX · Google Cloud Run

Dev2Done - Project & Client Management SaaS

dev2done.web86.site/

Developing a B2B SaaS platform for project and task management, client collaboration, team workflows, AI integrations, REST APIs, and webhooks.

Laravel · Vue.js · JavaScript · MariaDB

Open-Source MODX Components

Developed reusable components for MODX, including Cookie Consent Manager and ModxComments.

- Cookie Consent Manager
- ModxComments

MODX · PHP · JavaScript

EDUCATION

Technical College - Graduated in 2006

Specialization: Software and Maintenance of Computer Equipment and Automated Systems.

CONTINUING PROFESSIONAL DEVELOPMENT

Continuously improving my technical skills through online courses, independent study, and practical project development.

Additional areas of study include JavaScript, Vue.js, React, React Native, Laravel, WordPress development, SEO, and AI-assisted software engineering.

LANGUAGES

Russian · English · Chinese · Turkish

AVAILABILITY & WORK PREFERENCES

Remote work: up to 4 full working days per week, or part-time with a flexible schedule.

Interested in part-time employment, contract assignments, ongoing development, maintenance, and white-label partnerships with digital agencies.

I maintain regular volunteer commitments and therefore prefer a predictable, flexible work schedule.
